Text Styles

The SatBridge Design System uses Open Sans as the default font face. In nearly every instance, one of the following weights/ sizes should be used. In rare cases, a designer may have justification to use a weight or size not listed here, but this should be 1) very rare, 2) driven by a compelling use-case, and 3) agreed upon by the designer and developer.

Mobile Sizes & Weights

Use-case	Size and weight
Heading 1	**Open Sans 20pt SemiBold (600)**
Heading 2	Open Sans 16pt Regular (400)
Heading 2 Bold	**Open Sans 16pt SemiBold (600)**
Body	Open Sans 14pt Regular (400)
Body Bold	**Open Sans 14pt SemiBold (600)**
Small	Open Sans 12pt Regular (400)
Small Bold	**Open Sans 12pt SemiBold (600)**
Very Small	Open Sans 10pt Regular (400)
Very Small Bold	**Open Sans 10pt SemiBold (600)**

Colors

The SatBridge Mobile Application Design System includes three color palettes, for “Day,” “Night,” and “Outdoor(High Contrast)” modes.

Day View

Primary	Success	Danger	Light Grey	Grey	Dark Grey
#4A90E2	#4CD964	#E70824	#B0B0B0	#858585	#4A4A4A

Outdoor View

Primary	Success	Danger	Grey	Dark Grey
#045890	#259B24	#E70824	#858585	#4A4A4A

Night View

Primary	Success	Danger	Light Grey	Grey	Dark Blue
#2BC4FF	#4CD964	#E70824	#CCCCCC	#666666	#006A9E

Icons

The SatBridge Mobile Application Design System includes the Font Awesome icon library, as well as a few of our own custom icons. Icons most often come in two styles: outline and solid. A few examples are shown below.

Font Awesome Icons

Outdoor

Note that the font properties of the label might need to be dynamic in order to fit the title (i.e. the font size might need to dynamically decrease until the title fits). We have not encountered a scenario in which this was needed, yet, but we will very likely need this feature when we localize.

Tab Bar

The SatBridge Design System includes a Tab Bar that allows the user to navigate from feature set to feature set.

Multi-line Messages

Sent Message, Day

Hey, there! I was wondering where you were planning to set up camp in the morning?

Yesterday 4:43 pm

Received Message, Day

I had not picked out a place, just yet. Any recommendations?

Yesterday 4:43 pm

Sent Message, Night

There's a good spot about 80 feet from the boss's tent, due west.

Yesterday 4:43 pm

Received Message, Night

Sounds good. Any idea if someone

Yesterday 4:43 pm

Sent Message, Outdoor

You're kidding, right? If not, I can start asking around, but...

Yesterday 4:43 pm

Received Message, Outdoor

This isn't my first arctic rodeo. Actually, I think I might have brought an extra tent myself.

List Headings

List headings provide an easily-scanned landmark for users searching for items within a list. Think of them like aisle signs at a grocery store: “13 - Condiments, Sauces, Spices”.

Alerts

We plan to use native or native-like alert components in this application.
